

Decades of experience designing and manufacturing Ground Support Equipment makes Langa the first choice in the aerospace and defence industries.

## Ground Support Equipment

We are proud to be Langa's in-country partner, providing quality, precision and safety for Australian aircraft maintenance.

### Tripod Jacks

The Langa Industrial range of tripod jacks with load capacity from 2 to 180 tons, covers most of commercial and military narrow body and wide body aircrafts, regional fleets, business jets and helicopters.

### Axle Jacks

Our range of axle jacks from 5 to 150 tons, ensure an easy, safe and accurate lifting operation to perform the maintenance tasks of your aircraft.

### Towbars

Designed and manufactured for maximum efficiency during pushback and towing operations when attached to the nose landing gear of most common commercial and military narrow body and wide body aircrafts, regional fleets and business jets.

### Service Carts

Langa Industrial carts have been developed to last with extremely robust chassis and steering.

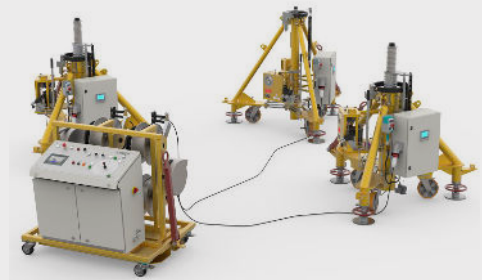

# Ground Support Equipment

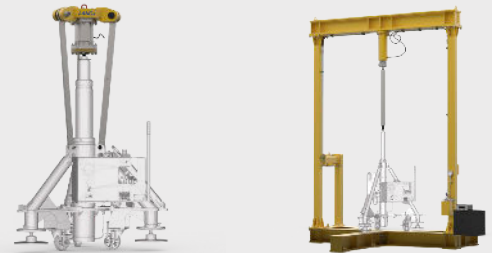

## Control Equipment

Langa Industrial control systems are specially designed to control and monitor aircraft lifting and lowering operations with a set of hydraulic tripod jacks, reducing time and resources required, but increasing accuracy and safety.

## Jack Testers

The best solutions to check, control and test tripod and axle jacks with reliability, precision and safety.

## Maintenance Platforms

Maximum quality standards make Langa Industrial platforms highly valuable for customers due to safety and operational comfort.

## Access Stairs

Our maintenance and access stairs offer the right solution for preventive or repair operations on aircrafts. Designed specifically for aeronautical service, our ladders and stands are ergonomic and built with worker safety in mind.

## Wheel & Brake Equipment

Thanks to compact design and proximity to the aircraft, wheel change operation can be done by a single person.
