## SEE THE BENEFITS

### of the HEPA 10-Quart Backpack Series

**Warranty:** Lifetime warranty on body, 5-years on motor and all electrical components, 90-days on tools and accessories.

- Fastest soil pick-up with high CFM airflow, making the backpack significantly more proficient than traditional uprights.
- Collects the most soils, leaving exhaust air cleaner with a disposable, heavy-duty paper micro-bag mounted inside a washable cloth shakeout bag.
- Lightweight ergonomic design, with a cushioned back-pad that fits the curve of any operator's back. The comfortable shoulder and waist belt design reduces fatigue, making work easier.
- 2 Lever-style latches lock the lid to the body and a static-dissipating vacuum hose securely threads into the backpack's lid, allowing for right- and left-handed vacuuming. The interchangeable lid converts the backpack into a powerful blower.
- Easy-to-reach On/Off power switch, quiet motor and 50-foot long safety power cord.
- 5-piece tool kit included on select models.

## APPLICATIONS

- Designed for vacuuming carpet, hard floors and upholstery. Worn on the back to allow for easy and quick vacuuming while walking. Ideal for hallways, airplanes and commercial spaces.

## TAPERED VS. CYLINDRICAL

### Compare the features. Compare the technology.

With three innovative design advances, the Raven has increased airflow, increased efficiency and has created the quietest vacuum in its class.

**1) Increased Airflow:** the backpacks deflector plate holds heavy debris away from the motor filter during use. It prevents the cloth bag from contacting the motor filter and reducing airflow.

**2) Excellent Design:** by tapering the vacuum body 3/4" per side, it prevents a bulging bag from contacting the body, allowing airflow around the bag.

**3) Most Quiet in its Category:** by adding 70 square inches of sound dampening waffle foam material, the HEPA 10 Quart Backpack is the quietest backpack vacuum available!

- A) **Angled, Static Dissipating Vacuum Hose:** keeps the hose out of the way.
- B) **Vacuum Bag Deflector:** keeps particles from tearing the vacuum bag.
- C) **Bag Support Plate:** keeps sagging heavy bags from impending air flow.
